EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leonid D. Thenor on 12/6/2010.

The application has been amended as follows:

1. (currently amended) A diagnostic ultrasound system comprising:

a probe ~~configured to measure for measuring~~ a subject using ultrasound by bringing said probe into contact with a subject in a first state;

a first image production means for producing a first image of said subject according to information sent from said probe;

an image display means for displaying said first image produced by said first image production means;

a second image production means for producing a second image of said subject according to information measured by bringing the probe into contact with said subject in a second state different from said first state in that pressure is applied to the subject;

a distortion operation means for calculating distortion information on a desired region-of-interest in said second image corresponding to the desired region-of-interest on said first image;

a display control means for controlling the display of the distortion information, which is calculated by said distortion operation means, on said image display means;

a means for setting reference information and the desired region-of-interest on said first image displayed by said image display means;

a variation operation means for calculating a macro displacement, which is a positional a change of the reference information set on said first image into a counterpart visualized in said second image, and for calculating a micro displacement, which is the deformation change of the region-of-interest in said first image into a counterpart visualized in of said first image versus said second image; and

a means for displaying the relationship between said macro displacement and said micro displacement calculated by said variation operation means and the distortion information calculated by said distortion correction means.
